

COVID-19 Vaccine Provider Webinar, Feb.23rd Highlights

Read below for topics covered or click links to view the video section for that topic.

Vaccine Shipment delays due to winter storm across Texas

- This week's vaccine allotments are scheduled to arrive in the first half of the week. After that delivery, providers should expect Week 11 allotments before the end of the week.

2nd Dose Allocations are now automatically allocated

- Providers no longer need to submit 2nd dose allocation requests. 2nd dose allocations are automatically scheduled for shipment based on received 1st dose allocations.
- Providers should continue to submit 1st dose allocation requests on a weekly basis for the population they can vaccinate within a one-week timeframe.

Pfizer Vaccine Doses Changes

- Per the FDA label change, Pfizer COVID-19 vaccine is now 6 doses per vial. Thus, each tray of the Pfizer COVID-19 vaccine is now 1,170 doses (195 vial x 6 doses/vial).

New Feature in ImmTrac2: Rapid Entry for COVID-19 Vaccines

- There is now an easy-to-use Rapid Entry form for approved COVID-19 Vaccine Providers reporting COVID-19 vaccine administration manually through the ImmTrac2 Web App.
- Race and Ethnicity are now mandatory in the "Additional Information" fields in the ImmTrac2 COVID-19 Rapid Entry Client Summary.

VAOS Reminders

- Transfers do not need to be confirmed by the receiving organization.

Provider Resources:

- DSHS COVID-19 Vaccine Provider hotline: (877) 835-7750, 8 a.m. to 5 p.m., Monday through Friday; Email: COVID19VacEnroll@dshs.texas.gov

Session Q&A:

- How and when do we request 1st dose allocations?
- Do we need to request allocations every week?
- What does an "Exported" status in VAOS under my service request mean?
- How does the process for automatic 2nd dose allocations work?
- Will I receive 2nd doses for patients to whom I administered leftovers of previous 2nd doses as 1st doses?
- Do providers need to report in ImmTrac2 and TDEM?
- Can you tell us more about adverse effects and allergies to report after administering the vaccine?
